FOREWORD

The Arizona Department of Public Safety is pleased to participate in and serve as the coordinating agency for the Arizona Uniform Crime Reporting Program. This publication is produced by the Arizona Department of Public Safety, Access Integrity Unit.

The purpose for the Crime in Arizona report is to provide statistical data regarding the nature and extent of crime throughout the state. This report does not draw conclusions as to the causes of crime. However, the report does provide the vital information necessary to assist law enforcement agencies, government, and the public in their approach to crime in our state.

This report is a culmination of a joint effort by our state's local law enforcement agencies to collect and organize crime data. It is intended to provide a basic understanding of Arizona crime problems, their characteristics, and the law enforcement actions taken to address these matters.

Sincere appreciation is expressed to all Arizona law enforcement agencies who have contributed to this publication.

UNIFORM CRIME REPORTING SYSTEM

OVERVIEW

The Uniform Crime Reporting (UCR) Program has been the starting place for law enforcement executives, students of criminal justice, researchers, members of the media and the public at large seeking information on crime in the nation. The program was conceived in 1929 by the International Association of Chiefs of Police (IACP) to meet the need for reliable uniform crime statistics for the nation. In 1930, the Federal Bureau of Investigation (FBI) was tasked with collecting, publishing and archiving those statistics.

Today, four annual publications, Crime in the United States, National Incident-Based Reporting System, Law Enforcement Officers Killed and Assaulted and Hate Crime Statistics are produced from data received from over 18,000 city, university/college, county, state, tribal and federal law enforcement agencies voluntarily participating in the program. The crime data are submitted either through a state UCR Program or directly to the FBI's UCR Program.

In addition to these reports, information is available on the Law Enforcement Officers Killed and Assaulted (LEOKA) Program and the Hate Crime Statistics Program, as well as the traditional Summary Reporting System (SRS) and the National Incident-Based Reporting System (NIBRS).

ARIZONA UCR PROGRAM

The Arizona UCR program first began receiving voluntary crime statistics from local law enforcement agencies in January 1975. Prior to this date, agencies submitted their crime data directly to the FBI. The Arizona Department of Public Safety is responsible for administrating the UCR program and providing necessary assistance and training to the contributing law enforcement agencies.

After the 1992 Arizona legislative session, participation in the UCR program became mandatory. Arizona Revised Statute (A.R.S.) § 41-1750(A)(2) states that the Department of Public Safety shall:

> "Collect information concerning the number and nature of offenses known to have been committed in this state and of the legal steps taken in connection with these offenses, such other information that is useful in the study of crime and in the administration of criminal justice and all other information deemed necessary to operate the statewide uniform crime reporting program and to cooperate with the federal government uniform crime reporting program."

Further, A.R.S. § 41-1750(D) states:

> "The chief executive officers of law enforcement agencies of this state or its subdivisions shall provide to the central state repository such information as necessary to operate the statewide uniform crime reporting program and to cooperate with the federal government uniform crime reporting program."

Statistics are received from local police agencies, county sheriff's offices, college and university campus police, and state police agencies. Federal agencies and tribal police agencies do not report to the Arizona UCR program and therefore, are not included in this publication.

The goal of this publication is to identify the nature and extent of criminal activity in this state. This information will not in itself prevent crime, but it may encourage all segments of society, by

understanding the problem, to work together with law enforcement agencies to reduce crime through more effective enforcement.

CRIME FACTORS

Statistics gathered under the UCR are submitted by the law enforcement agencies of Arizona and represent a spectrum of Arizona crime on statewide, local, and county levels. Awareness of the presence of certain crime statistics presented is necessary if fair and equitable conclusions are to be drawn. These crime-influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime developments of the community. Comparison of crime figures between communities should not be made without first considering the individual factors present in each community. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data listed. The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, metropolitan areas, states, or colleges and universities solely on the basis of their population coverage or student enrollment.

Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

- Population density and degree of urbanization.
- Variations in composition of the population, particularly youth concentration.
- Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
- Modes of transportation and highway systems.
- Economic conditions, including median income, poverty level, and job availability.
- Cultural factors and educational, recreational, and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate, including seasonal weather changes.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Citizens' attitudes toward crime.
- Crime reporting practices of the citizenry.

SCORING OF OFFENSES

Only the number of those offenses for Part I crimes and simple assault are scored (counted) under the UCR program. The method of scoring offenses varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and non-negligent manslaughter, negligent manslaughter, rape, aggravated assault and simple assault, one offense is scored for each victim, regardless of the number of offenders involved. For example, two offenders could be involved in the murder of one victim and, in this case, only one murder would be scored.

For robbery and larceny-theft, one offense is scored for each distinct operation which is separate in time and place. The number of victims in any one operation does not determine the number of

offenses. For example, if seven patrons in a bar are robbed, only one robbery would be counted. However, if the offender then leaves the bar and robs a passer-by, a second offense would be counted.

For burglary, one offense is scored for each structure which is illegally entered. For UCR purposes, a structure is generally defined as an enclosed, permanently occupied area. However, when the structure is an apartment complex, business or office building in which units are leased for a period of time, one offense is counted for each unit burglarized. The illegal entry of those structures used for the housing of a transient population, such as hotel rooms or boarding houses, are scored as one burglary regardless of the number of rooms entered.

For motor vehicle theft, one offense is scored for each vehicle stolen. For UCR purposes, a motor vehicle is defined as a self-propelled vehicle that runs on land and not rails. For arson, one offense is scored for each occurrence even if a more serious offense occurred as the result of the arson. Additionally, any attempts to commit any of the above offenses are also counted under the appropriate offense category with the exception of attempted murder which is listed under aggravated assault.

For multiple offenses that occur in one crime incident, only the most serious offense is counted. The exceptions are arson and human trafficking (which is always counted) and a combination of larceny-theft and motor vehicle theft (the motor vehicle theft will be counted). Part I offenses are ranked according to seriousness and appear in order from most serious to least serious under Offense Definitions. A Part II offense that occurs in conjunction with Part I offenses or by itself is not counted.

CLEARANCES

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved. Offenses may also be cleared by exceptional means when the offender: Commits suicide; makes a dying declaration; confesses while in custody or serving time for another crime; is prosecuted in another jurisdiction for the same offense; is a juvenile who is handled by notifying the parents; when the victim refuses to prosecute; or another jurisdiction refuses to extradite the offender. Clearances are counted as "adult" or "juvenile." A "juvenile" clearance is counted only when juveniles are exclusively involved in the commission and clearance of an offense. If the arrest of both adults and juveniles results in a clearance, it is counted as an "adult" clearance only.

PROPERTY STOLEN AND RECOVERED

The figures for value of property stolen and recovered report the value at each point in time. Although property can increase in value over time, it is more likely that stolen property will be recovered in a damaged condition. Therefore, recovery value does not necessarily represent a "clearance rate" for stolen property, and one cannot use it to determine law enforcement effectiveness in recovering stolen goods.

Because stolen and recovered property figures indicate thefts and recoveries in the current year, it is important to note that recovered property may have been stolen in a previous year. In addition, the type and value of stolen or recovered property is reported only for Part I offenses and does not include such Part II offenses as fraud, forgery or embezzlement.

ARRESTS

Arrest information is collected for all Part I and Part II offenses according to the age, sex, race, and ethnic origin of the offender. It is not possible, however, to correlate race or ethnic origin with the sex of the offender or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because arrest totals count all the offenders who have been arrested even if several were involved in the commission of a single offense. Therefore, arrest and clearance totals will only be equal by coincidence.

It should be kept in mind that arrest totals do not indicate the number of different offenders involved in the commission of a crime. A total of four arrests may represent the arrest of four different offenders or the arrest of the same offender on four different occasions. Also, arrest totals do not indicate the number of charges placed against an offender at the time of the arrest.

UCR OFFENSE INFORMATION

In Arizona's UCR Program, contributing law enforcement agencies are wholly responsible for compiling their own crime reports and submitting them to the Arizona Department of Public Safety's Access Integrity Unit. In an effort to maintain quality and uniformity in data received, the Access Integrity Unit furnishes to the contributing agencies continuous training and instruction in UCR procedures. All contributors are also furnished with the FBI's Summary Reporting System (SRS) User Manual which outlines in detail procedures for scoring and classifying offenses. On a monthly basis, law enforcement agencies (state, county and local) report the number of offenses that become known to them during the month.

For practical purposes, the reporting of offenses known is limited to the following crime classifications because they are the most serious and most commonly reported crimes occurring in all areas of the United States. Together, they serve as a gauge of the level and scope of crimes occurring across the country. They are divided into two parts; Part I and Part II. Information on the number of Part I offenses known to law enforcement, the number of clearances, and the number of persons arrested is reported each month. Only arrest data is reported for Part II offenses.

NATIONAL INCIDENT-BASED REPORTING SYSTEM

OVERVIEW

Due to a rapidly changing data processing environment, the FBI UCR Program and its partners within the law enforcement community, recognized the need for a more detail-oriented crime data collection. The National Incident-Based Reporting System (NIBRS) was implemented in 1989 to improve the quantity and quality of crime data collected by law enforcement by capturing more detailed information on each single crime occurrence. It was designed for law enforcement at its request. The NIBRS does not require law enforcement to collect additional data, but simply to delineate and use data already being collected. The NIBRS provides a more comprehensive view of crime in the United States, and offers greater flexibility in data compilation and analysis.

The NIBRS captures specific details about crimes and criminals through incident-based reporting. These details include the date, time, location, and circumstance of the incident. Additionally, characteristics of the victim and offender such as the age, sex, race, and ethnicity are collected along with information about their relationship; any involvement of weapons or drugs; details of property loss; whether the crime was motivated by bias; and if a computer was utilized to perpetuate certain types of crimes. Additionally, the NIBRS provides more robust information on officer assaults. Other enhancements to the NIBRS include collection of cargo theft data, human trafficking offenses, animal cruelty, expansion of the property and location codes, and redefining the race and ethnicity codes. When used to its full potential, the NIBRS identifies when and where crime occurs, what form it takes, and the characteristics of its victims and offenders.

BENEFITS OF NIBRS

The NIBRS produces more detailed, accurate, and meaningful data than the Summary reporting system. Armed with such information, law enforcement can better make a case to acquire the resources needed to fight crime. It has the capability of furnishing information on nearly every major criminal justice issue facing law enforcement today, including terrorism, white collar crime, weapons offenses, missing children where criminality is involved, drug/narcotics offenses, drug involvement in all offenses, hate crimes, spouse abuse, elderly abuse, child abuse, domestic violence, juvenile crime/gangs, parental kidnapping, organized crime, pornography, driving under the influence, and alcohol-related offenses.

Using the NIBRS, legislators, municipal planners/administrators, academicians, sociologists, and the public will have access to more comprehensive crime information than the traditional Summary reporting system can provide. The NIBRS also enables agencies to find similarities in crime-fighting problems so that agencies can work together to develop solutions or discover strategies for addressing the issues.

Participation of local law enforcement agencies in NIBRS is important for producing a highly accurate representation of crime. Crime data accuracy and completeness provide important snapshots of crime at all levels of law enforcement: local, regional, county, state, and national. The crucial starting point of this crime reporting process is at the local level.

The vision for the NIBRS is to become the law enforcement community's standard for quantifying crime, further supporting the mission of the FBI UCR Program, which is "provides national crime data management standards and services to inform, educate, and strengthen communities through Uniform Crime Reporting."

In 2003, Arizona began moving from summary-based reporting to incident-based reporting by obtaining a state-level NIBRS repository. In August of 2004, Arizona became certified to report crime data through the NIBRS by the FBI. Currently, there are five local agencies who have been certified as meeting all of the requirements for NIBRS reporting and are now submitting NIBRS-only data.

NIBRS VS. SUMMARY REPORTING

Most of the general concepts for collecting, scoring, and reporting UCR data in the Summary Reporting System Manual (2013) remain applicable in the NIBRS. For example, the jurisdictional rules for collecting data from city, county, state, tribal and federal law enforcement agencies and the conditions under which a state UCR Program must operate remain the same. The NIBRS User Manual (2013), provides a comprehensive look at the NIBRS and combines the old requirements retained from the traditional UCR Program with the new NIBRS requirements.

The NIBRS has much more detail in its reporting system than the traditional Summary reporting system. In the NIBRS, agencies collect offense information on 46 crimes known as Group A offenses; in the Summary reporting system, agencies collect offense information on eight crimes known as Part I offenses.

In the Summary reporting system, the "Hierarchy Rule" governs multiple offense reporting. If more than one crime was committed by the same person or group of persons and the time and space intervals separating the crimes were insignificant, then the crime highest in the hierarchy is the only offense reported. However, in the NIBRS, if more than one crime was committed by the same person or group of persons and the time and space intervals were insignificant, all of the crimes are reported as offenses within the same incident.

The Summary reporting system has two crime categories: Crimes Against Persons (e.g., murder, rape, and aggravated assault) and Crimes Against Property (e.g., robbery, burglary, and larceny-theft). In the NIBRS, a third crime category was added, Crimes Against Society, to represent society's prohibitions against certain types of activities (e.g., drug or narcotic offenses).

The NIBRS collects information about crimes committed using a computer; the Summary reporting system does not. The NIBRS collects more comprehensive data about drug offenses than the Summary reporting system.

NIBRS OFFENSE INFORMATION

NIBRS is an incident-based reporting system designed to collect data on each single crime occurrence and on each incident and arrest within the occurrence. The most significant difference between NIBRS and the traditional UCR system is the degree of detail in reporting.

Unlike the current, or summary, UCR system that collects only eight Part I crimes, NIBRS collects 23 Group A crime categories made up of 49 Group A offenses. In addition to the Group A offenses, there are 10 Group B offenses categories. They encompass all of the crimes not considered Group A offenses.

Law enforcement agencies use data elements and data values to report data to the FBI UCR Program via the NIBRS. Additional information about reporting requirements and specifications for submitting data to the NIBRS is located in the NIBRS Technical Specification. A data element is the smallest named item of data which conveys meaningful information or condenses a lengthy description into a short code.

Law enforcement agencies should use a series of the 58 established data elements, i.e., data fields, within each segment of the Group A Incident Report and in the Group B Arrest Report to describe the details of each component of crime.

Currently, the following Arizona law enforcement agencies participate in the NIBRS program: Apache Junction Police Department; Gilbert Police Department; Huachuca City Police Department; and the Yuma County Sheriff's Office. Until the Arizona UCR Program is able to collect a preponderance of data via the NIBRS, it will continue to convert the NIBRS statistics it receives to the traditional summary reporting system format for the Crime in Arizona publication.

*The difference between the total number of murders on this page and the total number from the charts on the following pages is due to ten offenses from prior years that were determined not to be homicides. The offenses were subtracted from the form, Number of Offenses Known to Law Enforcement, but not from the Supplementary Homicide Report that lists only the data from homicide incidents reported in 2015.

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED

OVERVIEW

The data collected under the Law Enforcement Officers Killed and Assaulted (LEOKA) Program pertains to felonious deaths, accidental deaths, and assaults of duly sworn city, university and college, county, state, tribal, and federal law enforcement officers who, at the time of the incident, meet all of the following criteria:

- Wear/carry a badge (ordinarily);
- Carry a firearm (ordinarily);
- Be duly sworn and have full arrest powers;
- Be a member of a public governmental law enforcement agency and be paid from government funds set aside specifically for payment to sworn law enforcement;
- Be acting in an official capacity, whether on or off duty, at the time of incident; and
- Death was directly related to the injuries received during the incident.

Also included are assaults which did not cause an injury; however, involved more than mere verbal abuse or minor resistance to arrest. The purpose of this data collection is to identify situations in which officers are killed or assaulted, describe the incidents statistically, and publish the data to aid agencies in developing policies to improve officer safety.

2015 SUMMARY

- There were a total of 1,878 police officers assaulted statewide in 2015.
- Personal weapons, such as hands, fists, and feet, were used in 1,407 assaults, or 74.9 percent.
- The time period of 12:01 AM to 2:00 AM recorded the highest incidence of assaults with 473, or 25.1 percent.
- The highest number of assaults, 693, or 36.9 percent, occurred when officers were responding to disturbance calls.
- Personal injuries were sustained in 464 assaults, or 24.7 percent.

CLEARANCES

There were 1,692 clearances for assaults on police officers reported in 2015. This represents a clearance rate of 90.0 percent.

BIAS CRIME DATA

OVERVIEW

On April 23, 1990, Congress passed the Hate Crime Statistics Act. This law required the Attorney General to collect data "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity." The Attorney General delegated the responsibilities of developing the procedures for implementing, collecting, and managing hate crime data to the Director of the FBI, who in turn assigned the tasks to the FBI UCR Program.

The UCR Program collects hate crime data regarding criminal offenses motivated, in whole or in part, by the offender's bias against a race, religion, disability, sexual orientation, ethnicity, gender, or gender identity. Due to the difficulty of ascertaining the offender's subjective motivation, bias is to be reported only if investigation reveals sufficient objective facts to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias.

In 1991, Arizona legislature mandated the collection of bias crime statistics. A.R.S. § 41-1750(A)(3) was amended in part to read that the criminal identification section within the Department of Public Safety shall:

"Collect information concerning criminal offenses that manifest evidence of prejudice based on race, color, religion, national origin, sexual orientation, gender or disability."

Due to the Violent Crime Control and Law Enforcement Act, the bias for disability, either physical or mental, was added to the national Bias Crime Statistical Program on January 1, 1997. Statewide collection began in January 1992.

Statistics received from Arizona law enforcement agencies for 2015 are listed on the following pages.
